Lab 10: Box Model and CSS Positioning

Learning Objectives

- Manipulate the box properties of elements
- Use div tags and the appropriate style rules to create a 2-column layout

Lab Instructions

JavaJam Coffee House Case Study

1. Create a folder CPSC1030\lab10 to store your files for this lab exercise.
2. Copy your JavaJam files from lab 7 into the lab 10 folder.
3. Download the JavaJamImages.zip file from Brightspace.
4. Complete the JavaJam Coffee Bar Case Study section of the "Focus on Web Design" at the end of Chapter 6.

Submit:

- Create a zip file of `CPSC1030\lab10` folder.
- Submit the "`lab10.zip`" file using BrightSpace.
- Transfer your lab10 folder to mylinux server and specify the URL of your website on Brightsapce .e.g. http://mylinux.langara.bc.ca/~student00/lab10

Marking Scheme:

- [20 point] for JavaJam Coffee House case study from Chapter 6
- [5 point] for the web-site working on mylinux server
- [5 point] for web pages and CSS files with no errors
